# 一枚目のスライド

Some static text on this slide. Adding `rbx` to `rcx` gives the desired result.

What is `fn main()` in Rust would be `int main()` in C.

```
fn main() {  
    println!("Hello World!");  
}
```

This has ``backticks`` in it (but the spaces are trimmed). And here the leading space is also trimmed.

**This slide changes!**

You can always see this.

**This slide changes!**

You can always see this. But this appears later!
